WHO AM I?

As a web developer, I see my goal as one of making the web a place that is open and accessible to as many people as possible. This means that my role is making the web performant, accessible, responsive, and minimal all whilst not sacrificing modern features like instant navigation and connectivity to social media.

Most of my working experience has been in retail, which I feel gives a real world insight into how everyday professional working software and the web impact everyone's daily life.

- JavaScript
- CSS
- Lua
- Bash
- Ruby
- LaTeX

PERSONAL TIMELINE

2020 – 2024 **Freelance Content Editor, UI/UX**
I put my skillset to use by freelancing on the web, taking on paid projects ranging from blog sites and ecommerce, to pro bono work for institutions that need and deserve a modern web presence, such as local sobriety homes.
`Hugo / Svelte / React / NPM`

2016 – 2020 **Learning to Code, Discovering Open Source**   Git, Linux, Free Software Repositories
Free Time
I began as a self taught developer, only trying to amuse myself by tinkering on my system and the modern web. Without open source code available freely online, My self teaching would have been impossible

early '00s **Born on the Web**   Web 1.0 Forums, AOL, Myspace
Public Education
As a 27 year old (born in 1995), being a user of computers and the web as an embedded part of my education.

CERTIFICATIONS AND EDUCATION

2023 – Current **CS50 Comp Sci Certification**   Harvard Online
I am currently enrolled in Harvard's open source computer science certifcation, where I hope to expand my knowledge of low level programming, such as C++, and to diversify my understanding of modern web services

2016 – 2017 **Front End Web Devloper Certification**   Freecodecamp.org
My time in this free course on web technology was the certification and course that taught me the fundamentals of the web at the time

HOBBIES

I love making experimental music and software, especially with free software languages like Faust and Tidalcycles.

PHILOSOPHY

My work is born out of the belief that software should put ethical concerns of people above all else.
